

Muhammad Fachreal Bernov

Personal Data

Date of Birth	: 25-11-1998
Nationality	: Indonesia
Marital Status	: Single
Gender	: Male
Religion	: Islam
Postal Address	: Kemiri Indah A1/18, Sidoarjo
Phone	: +62 89 542 082 5511
Email	: fahrealbernov@gmail.com
Foreign Language Proficiency	: English

Educational Qualification

Bachelor's Degree at Bhayangkara University Surabaya, Majoring in informatics engineering
GPA 3.54 (2017 – 2022)

Technical Qualification

Programming/Coding Languages

- Java
- JavaScript
- TypeScript
- SQL (Oracle SQL, MySQL, PostgreSQL)
- PHP
- C#
- Dart
- Kotlin

Platform / Operating

- Windows 11
- Linux (fedora)

Framework

- Spring Boot
- Spring MVC
- Spring
- ReactJS
- NodeJS
- ExpressJS
- Laravel
- CodeIgniter
- PHP Yii
- .Net Core
- jetpack compose
- Flutter
- Outsystems

Development Tools & Applications

- Docker
- Postman
- Laragon
- Apache-JMeter
- Software AG Designer (WebMethods)
- Git/Github/Gitlab
- Winscp
- Xampp
- mobaXterm
- Netbeans
- JetBrains (IntelliJ IDEA, DataGrip, WebStorm)
- Visual Studio Code
- Visual Studio
- Android Studio
- Google Antigravity
- Outsystem Studio 11
- Sourcetree
- Redis caching
- Elastic

Work Assignments

1. September 2023 – August 2026 | Application Developer

PT Mitra Integrasi Informatika (Metrodata Electronics Tbk)

Employment Mode: Onsite / Client Deployment

- **Client: PT Bank Negara Indonesia (Persero) Tbk (October 2025 – August 2026)**
 - **Project: Core QRIS Middleware & Merchant Onboarding System**
 - Developed and enhanced end-to-end Merchant Onboarding services using Software AG webMethods and Java to support high-scalability national digital payment structures.
 - Conducted extensive performance and stress testing using Apache JMeter, successfully handling 300,000 data entries to optimize backend merchant creation workflows.
 - Optimized complex Oracle SQL database queries for digital payment settlement and reconciliation processes, ensuring seamless management of PTEN headers and NMID data sync.
 - Built the Core QRIS Middleware and Transaction Log History modules to ensure strict audit compliance and robust integration between Wonder by BNI, BNI Portal, and PTEN (GPN) Switching gateways.
 - *Skill: webMethods, Spring Boot, Java, Oracle SQL, Apache JMeter, Integration Server, QRIS Standards.*
- **Client: PT Telekomunikasi Selular / Telkomsel (January 2024 – September 2025)**
 - **Project: Integrated Order Management System (IOMS)**
 - Maintained and optimized Integrated Order Management System modules using OutSystems (Reactive/Traditional).
 - Developed and enhanced the core financial budgeting and approval engine for high-value national infrastructure projects (e.g., nationwide tower deployments valued up to IDR 600B+).
 - Implemented multi-level hierarchical approval workflows for CAPEX, OPEX, and mixed budget allocations, ensuring secure routing from General Managers up to Vice Presidents and C-Suite/CEO levels.
 - Integrated secure REST APIs to bridge high-availability connectivity between IOMS and the Siena core ecosystem.

- Enhanced data processing speeds and service reliability by tuning and optimizing PostgreSQL database queries.
- *Skills: OutSystems, Capital Expenditure (CAPEX), Operating Expenses (OPEX), PostgreSQL, REST APIs.*
- **Project: SIMPLE (Mobile Approval Simplification Hub)**
 - Integrated financial approval pipelines from the IOMS project into SIMPLE, a unified mobile-based hub designed to streamline cross-project approvals including CAPEX, OPEX, and CAPEX_OPEX budgets.
 - Collaborated on backend API mapping and data synchronization to ensure secure, real-time approval tracking from mobile devices.
 - *Skill: OutSystems, Mobile Development, PostgreSQL, Docker, REST API.*
- **Project: PJ360 (Integrated Human Capital Solution)**
 - Contributed to the development of PJ360, a comprehensive internal human capital monitoring and talent management application.
 - Ensured smooth data exchange and integration between the main PJ360 employee database and external automation microservices like LeadershipKit.
 - *Skills: PHP, Yii Framework, Bootstrap, MySQL, HTML/CSS/JavaScript.*
- **Project: LeadershipKit (HR Onboarding Automation Scheduler)**
 - Developed and implemented an automated cron-job scheduler workflow written in PHP and Yii Framework to automate HR onboarding processes.
 - Designed the core scheduler engine to monitor employee promotion flags, automatically fetching training documents from corporate SharePoint and dispatching them via automated email templates to new team leaders.
 - *Skills: PHP, Yii Framework, Task Scheduling (Cron Jobs), SharePoint Integration.*
- **Internal Assignments PT Mitra Integrasi Informatika (Metrodata Electronics Tbk)**
 - **Project: Pickme Talent (Internal Resource Management System)**
 - Developed and enhanced Pickme Talent, a B2B talent marketplace and resource management platform designed to streamline the IT outsourcing workflow by connecting idle corporate engineers with major enterprise clients (e.g., BNI, Telkomsel, Pertamina).
 - Implemented and optimized a robust 3-role ecosystem featuring customized workflows for Talents (profile & CV management), Clients (advanced talent scouting and filtering), and Relationship Managers (matching and deployment dashboards).
 - Built a monolithic full-stack architecture using Java, Spring Boot, and Spring MVC, implementing server-side rendering with Thymeleaf to deliver responsive and fast-loading user interfaces.
 - Improved application responsiveness and reduced API latency by performing database query optimization and implementing caching layers.
 - Resolved critical bugs and conducted performance tuning to ensure system stability and a seamless user experience.
 - *Skills: Spring Boot, Java, Spring MVC, Thymeleaf, Spring Security, Database Optimization.*

2. July 2023 – August 2023 | Desktop Support Engineer (Part-Time)

PT Berca Hardayaperkasa

- Standardized OS images, security configurations, and domain integration to improve endpoint consistency and reduce configuration issues.

- Configured GlobalProtect VPN and network settings for BSI Center to ensure secure remote access.
- Performed network troubleshooting and path tracing to diagnose and resolve connectivity incidents, minimizing user downtime.
- Skills: Computer Standardization, GlobalProtect, Cisco Packet Tracer

3. November 2022 – December 2022 | PHP Web Developer (Part-Time)

PT SBG Solusi Bisnis

- Developed dynamic navigation features and UI/UX modernization using PHP and Bootstrap.
- Maintained and patched critical internal modules for E-Claims and Sales Management Systems (SMS).
- Skills: PHP, *HTML/CSS/JavaScript*.

Projects

1. ForzaAPI | Jun 2026 – Present

A RESTful Open API built with Kotlin and Spring Boot, designed to serve comprehensive vehicle data and statistics across the Forza Horizon and Forza Motorsport game series.

Skills: Kotlin, Spring Boot, Redis, PostgreSQL, REST APIs.

2. Core QRIS Middleware & Merchant Onboarding (Project Stabilization) | Oct 2025 – Present

Contributed to the QRIS Stabilization Project, a strategic initiative to migrate the legacy system (MOMSPE) into a modern, high-scalability ecosystem (Core QRIS / Host QRIS) to handle end-to-end national digital payment processing and merchant management.

Skills: Oracle Database, Java, webMethods, Apache JMeter, QRIS Standards.

3. Pickme Talent (Internal Resource Management System) | Sep 2025 – Oct 2025

Developed and enhanced Pickme Talent, a B2B monolithic full-stack talent marketplace platform designed to streamline the resource allocation workflow for idle engineers, connecting them with enterprise clients and Relationship Managers (RM).

Skills: Java, Spring Boot, Spring MVC, Thymeleaf, MySQL.

4. IOMS (Integrated Order Management System) | Jan 2024 – Sep 2025

Contributed to IOMS, an enterprise-grade internal platform at Telkomsel designed to streamline and manage internal project tracking. Specifically focused on developing and enhancing the financial budgeting modules, enabling precise tracking, allocation, and auditing of CAPEX (Capital Expenditure) and OPEX (Operational Expenditure) workflows valued up to IDR 600B+ across various corporate projects.

Skills: OutSystems, .NET Framework, PostgreSQL, REST APIs, CAPEX/OPEX Budgeting.

5. LeadershipKit | Jul 2025 – Sep 2025

Developed and implemented LeadershipKit, an automated workflow and cron-job scheduler application at Telkomsel designed for HR onboarding automation. The system automatically scans the employee database to detect newly promoted team leaders, fetches official preparation documents from the corporate SharePoint repository, and dispatches them via automated email templates to streamline leadership transition readiness.

Skills: PHP, Yii, Task Scheduling (Cron Jobs), SharePoint Integration.

6. Project PJ360 | Jun 2025 – Sep 2025

Developed an integrated human capital suite featuring PJ360, a comprehensive 360-degree performance appraisal and talent monitoring application, seamlessly integrated with LeadershipKit to automate cron-job scheduling, employee promotion tracking, and secure corporate SharePoint document distribution.

Skills: PHP, Yii Framework, Bootstrap, MySQL, HTML/CSS/JavaScript.

7. MentalFit Assesment | Nov 2023 – Nov 2023

Developed a full-stack web-based survey platform utilizing Spring Boot and Bootstrap to provide a comprehensive and easily accessible application for employee mental health evaluation.

Skills: Java, Spring Boot, MySQL, Bootstrap, HTML/CSS/JavaScript.

8. Dlanguages (Language E-Learning Marketplace) | Aug 2023

Developed Dlanguages, a web-based e-learning marketplace MVP tailored specifically for language learning platforms, inspired by Udemy's core business model.

Skills: .NET, C#, React.js, Microsoft SQL Server, Material-UI.

9. Truck Route Optimization System | Jul 2021 – Jun 2022

Developed a web-based routing optimization system as a capstone project to determine the fastest path for dump trucks. The core engine utilizes the Breadth-First Search (BFS) algorithm to analyze graph-based geographic data, minimizing transit time and improving logistical efficiency. Built the entire application using Laravel, PHP, and MySQL.

Skills: Laravel, PHP, Algorithms (BFS), MySQL, Bootstrap.

10. Gaming & Tech Content Hub (News Gaming) | 2020

Built a responsive dynamic news portal website focusing on gaming and the latest technology updates. Developed as an introductory college project to master the MVC (Model-View-Controller) architecture using CodeIgniter, PHP, and MySQL for robust content management features.

Skills: PHP, CodeIgniter, MySQL, Bootstrap, HTML/CSS/JavaScript.

Trainings

1. Metrodata Coding Camp Java, Metrodata Academy (september – November 2023)
 - Fundamental Programming
 - Java Programming
 - Framework Java Spring boot
 - Frontend fundamental
2. Fullstack Engineer Bootcamp, coding.id (May – August 2023)
 - JavaScript Fundamentals
 - Algorithms and Object Oriented Programming
 - Basic Database

- Frontend programming with ReactJS
- Backend programming with .NetCore

Organization

1. Member at Himatika for the period of April 2019 - June 2021
2. Journalism Division at Ukpim for the period of August 2017 - June 2021

Experiences

1. volunteers at Arubalympics as a University Representative strengthening regional knowledge in computer networking for East Java province, analyzing enterprise routing and switching architectures, as well as contributing to collaborative technical problem-solving assessments. (2020)
2. volunteers at ICoSTA 2020 (IEEE Indonesia Section) as an Organizing Committee Member managing the event operations and logistics for the international conference hosted at Universitas Bhayangkara Surabaya, ensuring a seamless experience for global academic presenters and participants discussing Smart Technology and industrial IoT. (February 2020)
